

LOKESH SAINI

MERN Stack Developer (Fresher)

+91 740-463-1987 | lokeshsaini00312@gmail.com | [linkedin.com/in/lokesh-saini](https://www.linkedin.com/in/lokesh-saini)

PROFESSIONAL SUMMARY

Aspiring MERN Stack Developer with hands-on experience building and shipping full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, and secure authentication systems, with a strong foundation in JavaScript and modern development tools.

EDUCATION AND CERTIFICATION

- Bachelor of Computer Applications (BCA) — Baba Mastnath University
- Professional Certification in Graphic & Web Design Development — Arena Animation, Sec 14, Gurgaon

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, React Router, Recharts, Angular, jQuery

Backend & Database: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication

Other Tools & Concepts: MediaPipe (Computer Vision), Canvas API, Data Visualization, Responsive Web Design

Design Tools: Adobe Photoshop, Illustrator, Animate, Adobe XD, Figma

Styling Frameworks: Tailwind CSS, Bootstrap

Version Control: Git, GitHub

PROJECTS

Expense Tracker – Full-Stack Web Application *(Completed)*

Full-Stack Developer | React.js, Node.js, Express.js, MongoDB, JWT

- Built a full-stack personal finance web application with secure JWT-based authentication and bcrypt password hashing for user account protection.
- Designed an interactive analytics dashboard using Recharts to visualize income and expense trends through bar, line, and pie charts, including 30/60-day financial summaries.
- Developed RESTful APIs with Express.js and MongoDB (Mongoose) for transaction management, and integrated Multer for profile image uploads and XLSX for exporting reports to Excel.

Digital Marketing Agency Website *(Completed)*

Frontend Developer | React.js, React Router, Tailwind CSS, Vite

- Developed a responsive, multi-section marketing website using React.js and Tailwind CSS, with dynamic routing for individual case-study pages via React Router.
- Built reusable, data-driven UI components (navigation, service cards, team profiles, testimonials) powered by a centralized data layer for streamlined content management.
- Implemented a custom scroll-spy hook using the Intersection Observer API to sync navigation state with scroll position, and integrated React Helmet Async for SEO metadata.

Air Draw – Gesture-Controlled Drawing Application *(Completed)*

Frontend Developer | JavaScript, HTML5 Canvas API, MediaPipe

- Built a browser-based drawing application that uses MediaPipe Hands for real-time hand tracking and the Canvas API to render neon-style visual effects.
- Implemented gesture-recognition logic mapping hand poses (index finger, open palm, fist, pinch, thumbs-up) to actions such as draw, erase, pause, drag, and color cycling.
- Designed a multi-layer canvas rendering system (camera, glow, draw, overlay) with customizable brush size, glow intensity, color presets, and PNG export.

Dine Flow *(In Development)*

Full-Stack Developer & UI/UX Designer | React.js, Node.js, Express.js, MongoDB, Figma

- Architecting a QR-based contactless dining system to automate table-side ordering and streamline restaurant operations for dine-in customers.
- Developing a mobile-first interface featuring dynamic menu rendering, real-time order status tracking, and automated table-session management.
- Building the frontend in React.js and the backend with Node.js, Express, and MongoDB, with UI/UX prototyped in Figma.
