PROJECTS

Expense Tracker — Full-Stack Financial Dashboard

<https://expensetrackerbylokeshtsaini.vercel.app/>

- Built a full-stack personal finance application with secure JWT based authentication and bcrypt password hashing, protecting all user financial data
- Designed an interactive analytics dashboard with Recharts, rendering bar, line, and pie charts for income/expense trends, including rolling 30- and 60-day summaries
- Engineered RESTful APIs in Express.js/MongoDB for transaction CRUD operations; integrated Multer for profile image uploads and XLSX export for downloadable financial reports

Digital Marketing Agency Website – Responsive Marketing Site

<https://velocity-digital.agency.vercel.app/>

- Developed a responsive, multi-section marketing website with dynamic routing for individual case-study pages via React Router
- Built a reusable, data-driven component library (navigation, service cards, team profiles, testimonials) powered by a centralized content layer, cutting duplicate code across pages
- Implemented a custom scroll-spy hook using the Intersection Observer API to sync navigation state with scroll position added React Helmet Async for per-page SEO metadata

Air Draw – Gesture-Controlled Drawing Application

<https://i-lokeshtsaini.github.io/HandAirDraw>

- Built a browser-based drawing app using MediaPipe Hands for real-time hand tracking, rendering neon-style visual effects via the Canvas API
- Implemented gesture-recognition logic mapping five hand poses (index finger, open palm, fist, pinch, thumbs-up) to draw, erase, pause, drag, and color-cycle actions
- Designed a multi-layer canvas rendering pipeline (camera, glow, draw, overlay) with customizable brush size, glow intensity, color presets, and PNG export

Dine Flow – QR-Based Contactless Dining System

- Architecting a QR-based contactless ordering system to automate table-side ordering and streamline dine-in restaurant operations
- Developing a mobile-first interface with dynamic menu rendering, real-time order status tracking, and automated table-session management
- Prototyping full UI/UX flow in Figma prior to implementation; building frontend in React.js and backend in Node.js/Express/MongoDB

SUMMARY

Full-stack developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js), with four self-driven projects covering authentication systems, RESTful API design, data visualization, and real-time UI interaction. Comfortable owning a feature end-to-end — from Figma prototype to deployed API. Actively building toward production-grade, user-facing applications with clean, maintainable code

SKILLS

Frontend

React.js

React Router

JavaScript

ES6

HTML5

CSS3

Tailwind CSS

Bootstrap

Recharts

Backend

Node.js

Express.js

RESTful API Design

JWT Authentication

bcrypt

Database

MongoDB

Mongoose

Design and Other Tools

Git

GitHub

Figma

Adobe XD

Adobe Photoshop

Illustrator

Animate

Postman

Canvas API

MediaPipe Computer Vision)

EDUCATION

Bachelor of Computer Applications (BCA)

[Baba Mastnath University](#)

TRAINING / COURSES

Professional Certification in Graphic & Web Design Development

[Arena Animation, Sec 14, Gurgaon](#)
